HYVE | Channel & Brand Vibrancy Platform

In the real world, complex and interlinked constellations spark, influence, and interact. Brands shine brightest when the sum becomes truly greater than their constituent parts through careful curation and connectivity.

We help brands earn a meaningful role in people's lives by translating brand promise into experience across the customer journey ecosystem.

Take Me To The Data

Journey Planner

McCANN

Our mission is to help the challenger brands of today to become the brand icons of tomorrow. We'll showcase two exciting innovations that we have developed that will help you to shine brighter and grow faster in the lives of your audiences:

Brand Vibrancy Score: In a world of expensive brand tracking surveys and a lack of accountability attributed to investment in brand comms, BVS provides fast, cost-efficient and real time analysis of how your brand is showing up across the total brand ecosystem and predicts its future commercial performance.

Audience Vibrancy Score: Where many audience intelligence and segmentation platforms are based on outmoded survey data, AVS pinpoints the current live spending power of your audiences across the country, enabling you to pivot marketing and media strategies to win share of wallet.

McCANN

01

Experience **Motivation**

The **Assault** On Distinctiveness

GAMAM platforms **breed** homogeneity.
Rules-based marketing **produces** marginal gains.
Funnels mask **chaotic** realities.
Brand preference **disruption** happens in seconds.
Organizational **siloes** **underserve** customers.
Integration is a **means not an end**.
Academia is **oversimplifying** the meaning of "brand".

02

Experience **Mantra**

Constellation Planning

In the real world, complex and interlinked constellations spark, influence, and interact. Brands shine brightest when the sum becomes truly greater than its constituent parts through careful curation and connectivity.

03

Experience **Mission**

Shine **Brighter**, Grow **Faster**

"Brands with a strongly integrated brand experience command 79% higher purchase intent and an average of 45 more Net Promoter Score points than those who offer a lesser experience."

Brand Vibrancy Score

Trust builds loyalty, intent drives action, recall ensures brand recognition, and visibility increases brand awareness—key factors influencing consumer behavior, fostering brand loyalty, and driving successful marketing strategies.

01

Trust

Trust in brand marketing signifies a consumer's confidence and belief in a brand's reliability, credibility, and ability to consistently deliver on promises, fostering loyalty and positive relationships.

02

Intent

Intent in brand marketing refers to a consumer's inclination or purpose to engage with or purchase a particular brand's products or services, often influenced by perceptions, preferences, and previous interactions.

03

Visibility

Visibility in brand marketing refers to the extent and prominence of a brand's presence, content, or advertisements, ensuring that target audiences easily encounter and engage with the brand across various channels.

04

Recall

Brand recall is the ability of consumers to remember a specific brand when unprompted, associating it with particular products or services based on previous experiences, exposure, or interactions.

McCANN

Brand Vibrancy Score

Trust builds loyalty, intent drives action, recall ensures brand recognition, and visibility increases brand awareness—key factors that influence consumer behavior, foster brand loyalty, and drive successful marketing strategies.

Our Thoughts

Brand Vibrancy Score (BVS) is noticeably higher in Spain (7.00) and Italy (6.58), and slightly ahead in France (4.85), compared to the UK (3.64). This reflects the strength and relevance of .com platform, which serves its European markets with a more visible, trusted, and engaging brand experience.

Visibility is much stronger in Spain (8.08) and Italy (5.00) than in the UK (3.72), showing that the brand is more prominent and discoverable in online channels. This suggests the .com site is better optimised for awareness in these markets.

Trust and Recall are also significantly higher in Italy (Trust: 7.18, Recall: 7.71) and Spain (Trust: 5.90, Recall: 6.30), compared to lower UK levels (Trust: 3.08, Recall: 3.99). This indicates that users in these markets remember the brand more easily and see it as a reliable choice for travel planning.

The intent to use is also stronger across European markets, with Spain (7.72) and Italy (6.44) well ahead of the UK (3.75). The .com site does a better job of converting awareness into active consideration.
